

CASE 2

30000 under 30

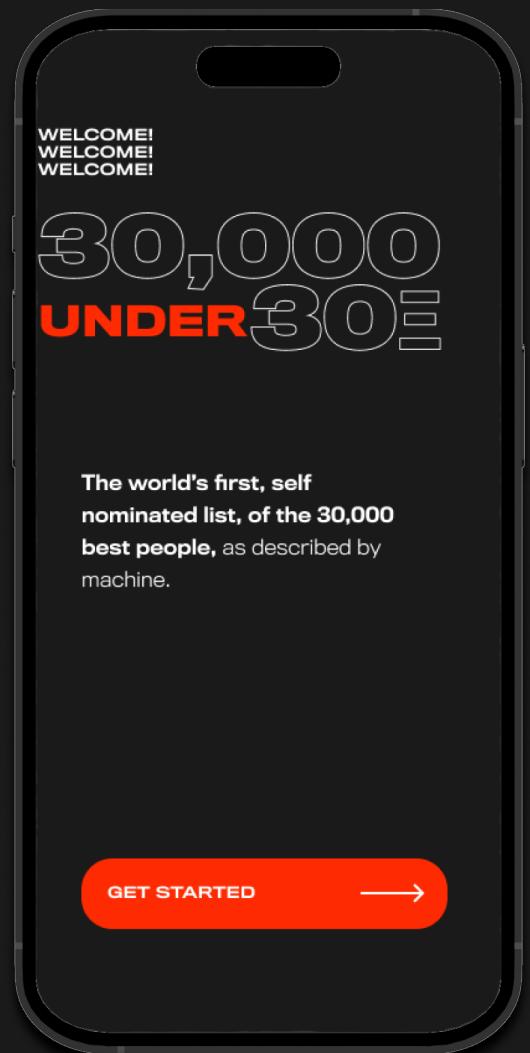

The screenshot shows a dark-themed website. At the top right is the logo "30000 UNDER 30". Below it, the text "#08" is displayed next to the name "ADAM LUKASIK". To the left is a circular portrait of Adam Lukasik, a man with a beard, wearing a black shawl over a patterned garment. To the right of the portrait is a block of text describing him as the founder of Treatbot, which has raised \$5.5 million and is backed by Andreessen Horowitz.

A year ago, nobody had heard of Adam Lukasik; now, you hear his name and instantly think of his breakthrough tech company sometimes called the **large hadron collider for cupcake making**. He's the founder of Treatbot, which has raised \$5.5 million and is backed by Andreessen Horowitz. It's a robotic arm that lets you bake cupcakes at home.

30000 under 30 was an AI prank me and a couple of friends built to satirize the Forbes 30 under 30 list. We launched the site on April 1, 2021

Our goal with 30000 under 30 was to poke fun at the status-obsessed spectacle of the Forbes list, and the arbitrary process that goes into forming it. We operationalized this satire by creating a website where anyone could sign up and have a convincing 30-under-30-esque bio written for them.

To accomplish this we used OpenAI's GPT-3 API, which had just recently been released at the time.

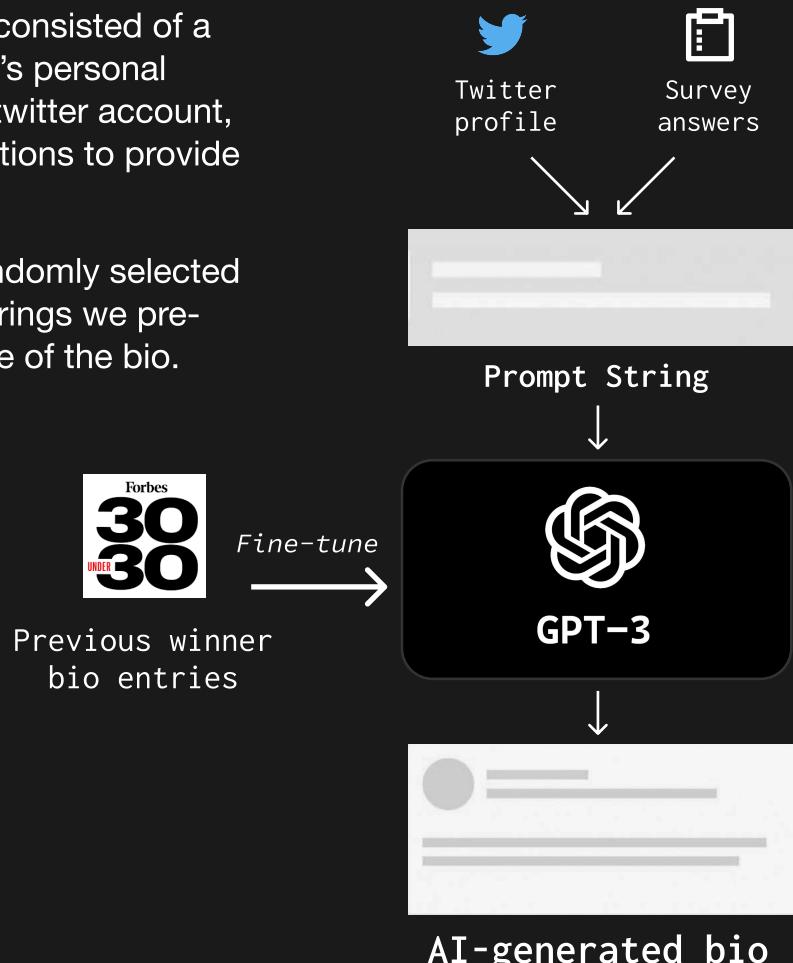

AI for Fun and Mischief

The basic architecture of 30000 under 30 consisted of a 2-layer AI model. First, we ingested a user's personal information by having them connect their twitter account, and then give them 2 random survey questions to provide information to personalize their bio.

We then applied those data points to a randomly selected template out of ~100 comedic template strings we pre-wrote. This string became the 1st sentence of the bio.

The next layer of the model was an instance of GPT-3 fine-tuned on previous Forbes 30 under 30 bios, split between the 1st sentence as an input and the rest of the bio as an output.

The model took in the 1st sentence provided by the templating engine and passed it to our GPT-3 instance, which then generated the rest of the bio based off of the comedic set-up. Basically, GPT-3 played the “straight-bot” to our template engine, taking its ridiculous premise and doing its best to turn it into a run of the mill 30 under 30 bio.

The three mobile phone screens show the user flow:

- Step 1:** Displays the header "30000 UNDER 30" and a progress bar at Step 1. The text "GETTING ON THE LIST WE NEED TO GET TO KNOW YOU" is prominently displayed. Below are five input fields: FIRST NAME, LAST NAME, PRONOUNS, EMAIL, and TWITTER.
- Step 2:** Displays the header "30000 UNDER 30" and a progress bar at Step 2. The text "WHERE DO WE START? THE A.I. HAS SOME IDEAS" is displayed. Below are two input fields: "Where do you work?" and "What is your favorite hobby?", each with a "YOUR ANSWER" placeholder. A circular arrow icon is located below the second input field.
- Step 3:** Displays the header "30000 UNDER 30" and a progress bar at Step 3. It shows a profile picture of Humphrey Obuobi and his bio: "HUMPHREY OBUOBI". Below the bio is a paragraph: "Humphrey Obuobi started off his career at Google, but he always remembered his real passion: Amish breakdancing competitions. So he quit his job to start his own company, The Amish Outlaws, which creates events and media around the traditional Amish sport. He's even written a book on the subject, "Amish Breakdancing."". At the bottom, it shows "Submitter: @adamdoesathing Time On List: 0h:0:90s".

Viral Satire

Upon launching on April 1st, we picked up a lot of traffic from people tweeting out their bios over the course of the day. Some of them can still be seen at twitter.com/zeitgeist_fm.

We received about 500 sign-ups in the first day and 1500 in the first week of the website being up. LLMs were still a very novel technology at the time so people got a kick out of seeing their capabilities demonstrated based off of their creative input.

But in addition, I think the satire also spoke to a feeling a lot of people had; the crony-ism and dubious nature of the Forbes list is a poorly kept secret in tech circles. By creating a list anyone could sign up for, we let everyone in on the joke while also giving them their moment of glory as an esteemed 30000-under-30er

Eshita @eshita
I made the list! 30kunder30.com/account/bfe5b...

Ananay Batra @ananaybatra
I'm on the 30k under 30 list homeless 30kunder30.com/account/407cd6...

Dhruv Gupta @iamdhruv4
I accomplished my dream. I can now officially say I've got a fake 30 under 30 account for clout. Now you can too! 30kunder30.com/account/27f7af...

Neel Mehta @neel_a_mehta
Some personal news: I've landed a spot on the Forbes 30... thousand under 30? 30kunder30.com/account/53c220...

But in all seriousness, props to the team @zeitgeist_fm who made this brilliant satire of under-30 lists, combining AI, NFTs, and social commentary into one project.

JEFFREY OLINGER AIA

Jeffrey Olinger AIA started his year with a deceptively simple idea: give everyone in Beirut a pencil. It was a comment on the region's history of violence, but it was also a serious design challenge. Olinger and his team spent over a year developing the perfect design for the pencil, including the kind of graphite core, and even the shape of the eraser. The result is the Pencil of Peace, and a social enterprise that's helping fund a tech education center for girls in Beirut.

A Fitting Conclusion

While it would have been great to get to our goal of 30,000 sign-ups on the list, we knew that it was always a bit of a pipedream. But even before we could try to reach that goal, Forbes' legal team emailed us a Cease & Desist letter.

Even though our allusion to their list obviously qualified as fair-use, we ultimately decided it wasn't worth the hassle of trying to fight the letter, and decided to take it as a concluding win for our prank.

Notice of Infringement | Cease and Desist

Apr 30, 2021, 3:05 AM

I write on behalf of Forbes Media LLC ("Forbes"). It has come to our attention that you have used the Forbes name, logo, registered trademarks and/or trade dress, including the 30 Under 30 brand and designs (collectively, "Forbes IP") to promote your website, NFT and/or other commercial ventures (your "Unauthorized Activity"), clearly attempting to profit off a false association with Forbes and misappropriating Forbes IP. Some of the infringing content can be found here: <https://www.30kunder30.com/> which is largely pulling the designs from here: <https://www.forbes.com/sites/forbesunder30team/2020/09/17/a-decade-of-disruption/?sh=5648ce327401>

We demand that you immediately cease and desist from this unlawful Unauthorized Activity and refrain from any future use of Forbes IP, unless such use has been approved by Forbes in writing by an authorized representative. You must also provide this office, today, with written assurance that you have complied with this demand.

We await your prompt compliance. All rights reserved.

Sincerely,

Jessica Bohrer
